Capital efficiency

Efficient Portfolio margining approach via PRISMA

*Calculation Date: 14 Dec 2022

- Single product margins in this example are between 6.38% and 13.2% (with an portfolio average of 8.27%)
- However, based on PRISMA model, margin for the entire portfolio is only 1.86%, which is a reduction of 77%
- **In general:** the better a portfolio is balanced, the higher the margin offsets under PRISMA will be
- Eurex is in a unique position to generate margin offsets, since it hosts an open interest pool of ~140mn Equity & Index derivatives, which are all used to offset against each other
- Index products hereby include STOXX, DAX, SMI, MSCI, FTSE / Equity Products include Eq. Options / SSF

Improving order book liquidity picture

Order book liquidity has continuously improved since Covid peak in March 2020

ELM* in MSCI Europe, World & EM for a 2M EUR Order

Number of Trades in MSCI Europe, World & EM Futures

- Spreads on MSCI World Futures (FMWO) have been tightening continuously over time.
- Average impact for a 2M EUR order has decreased from ~15 bps in 2018 to ~6 bps in Q1, 2022
- Spreads on MSCI Europe Futures (FMEU) and EM Futures (FMEF) increased again in March 2022 based on Russian invasion
- Better liquidity is resulting in higher number of trades (esp. in MSCI World) and vice versa

* Eurex Liquidity Measure (ELM) measures the market impact of a certain order size in bps 7

4

Flexibility in entering trades

Majority is still block traded

Order book („regular“) vs TES trades („Block, EFP“) in MSCI Futures

- Even though Eurex encourages and incentivizes trading via the CLOB (Central Limit Order book), the majority of trading is still done via trade entry (TES)
- In order to facilitate those in the most efficient way, Eurex is offering a number of functionalities:
 - All blocks in MSCI Futures can be entered with **0.001** increments
 - **Flex trades** are allowed for Futures / Options
 - **Minimum Block Trade sizes** are rather low
 - Intraday **Non-Disclosure limits** in place
 - **Strategy trades** between Futures & Options
 - **Longer expiries** for FMEF, FMWP, FMFP (5 years)
 - **EnLight** is offered as a RFQ solution
 - MOC T+x is coming to facilitate **Basis Trading**

Cheaper fees

Eurex is charging only ~50% exchange fee for MSCI Futures vs main competitor

Contract	MSCI Futures		MSCI Options		
	EUR/ GBP/ USD/ CHF		EUR/ GBP/ USD		
Currency					
Fee differentiation	Standard fee	Reduced fee *			
Account	A / P / M	A / P / M	A	P	M
Orderbook	0.6	0.3	0.58	0.5	0.5
Eurex EnLight	0.9	0.45	0.58	0.5	0.5
TES	0.9	0.45	0.58	0.5	0.5
Threshold (number of contracts)	n. a.	n. a.	3,000 **	2,000 **	n. a.

* For **EM Futures** (FMEM, FMEF) / **EAFE Futures** (FMFA, FMFP) / **Asian country Futures** (FMCN, FMCH, FMIN, FMID, FMMY, FMPH, FMTH, FMTW) until end of 2023

** Fee per contract (contract number ≤ threshold value) in respective currencies

6

Buy-Side clients are getting increasingly involved

End client positions now represent 24% of Eurex's MSCI Derivatives flow

- With UMR (Uncleared Margin Rules) coming into play, it is expected that additional flow from buy-side clients will come into Futures
- Conversations ongoing with clients and dealers on how to optimize this shift
- Additional growth should attract also new players like hedge funds and more market makers / liquidity providers

7

Extended trading hours

Adding Asian hours has been crucial to compete in Emerging Markets

Share of MSCI EM Index open for trading throughout the trading day

Traded contracts in MSCI during Asian hours

➤ As the majority of EM countries are Asia-based (in total almost 80%), it is important to foster tradability of MSCI Futures in the Asian hours

Building a MSCI Derivatives ecosystem

Options & Futures on one platform / additional product alternatives

Open Interest in MSCI Options

- Offering Futures and options on the same platform offers advantages in hedging, margining, strategy trading
- Development in the options segment is focussing on EM, World & EAFE indices, as shown on the left
- Beside of that, Eurex offers different product types (same index in different currencies, Price vs NTR indices)
- Additional choice is given by the launch of ESG index derivatives: Screened indices follow a simple, values-based approach, whereas the Enhanced Focus CTB derivatives reach for a higher ESG score, while maintaining a low tracking error to the parent index
- Finally, Eurex is also offering Dividend point Futures (again on EM, World & EAFE) to make Dividends tradable on it's own
