Eurex Clearing AG

V 3.7.1

Date: 17.06.2024

© Eurex 2024

Deutsche Börse AG (“DBAG”), Clearstream Banking AG (“Clearstream”), Eurex Frankfurt AG (“Eurex”), Eurex Clearing AG (“Eurex Clearing”), Eurex Repo GmbH (“Eurex Repo”) are corporate entities and are registered under German law. Eurex Global Derivatives AG is a corporate entity and is registered under Swiss law. Clearstream Banking S.A. is a corporate entity and is registered under Luxembourg law. Eurex Frankfurt AG is the administering and operating institution of Eurex Deutschland. Eurex Deutschland is in the following also referred to as the “Eurex Exchange”.

All intellectual property, proprietary and other rights and interests in this publication and the subject matter hereof (other than certain trademarks and service marks listed below) are owned by DBAG or its affiliates and subsidiaries or used under authorization by their respective owners, including, without limitation, all patent, registered design, copyright, trademark and service mark rights. While reasonable care has been taken in the preparation of this publication to provide details that are accurate and not misleading at the time of publication DBAG, Clearstream, Eurex, Eurex Clearing, Eurex Repo as well as the Eurex Exchange and their respective subsidiaries, servants and agents (a) do not make any representations or warranties regarding the information contained herein, whether express or implied, including without limitation any implied warranty of merchantability or fitness for a particular purpose or any warranty with respect to the accuracy, correctness, quality, completeness or timeliness of such information, and (b) shall not be responsible or liable for any third party’s use of any information contained herein under any circumstances, including, without limitation, in connection with actual trading or otherwise or for any errors or omissions contained in this publication.

This publication is published for information purposes only and shall not constitute investment advice respectively does not constitute an offer, solicitation or recommendation to acquire or dispose of any investment or to engage in any other transaction. This publication is not intended for solicitation purposes but only for use as general information. All descriptions, examples and calculations contained in this publication are for illustrative purposes only.

Eurex and Eurex Clearing offer services directly to members of the Eurex Exchange respectively to clearing members of Eurex Clearing. Those who desire to trade any products available on the Eurex market or who desire to offer and sell any such products to others or who desire to possess a clearing license of Eurex Clearing in order to participate in the clearing process provided by Eurex Clearing, should consider legal and regulatory requirements of those jurisdictions relevant to them, as well as the risks associated with such products, before doing so.

Only Eurex derivatives that are CFTC-approved may be traded via direct access in the United States or by United States persons. A complete, up-to-date list of Eurex derivatives that are CFTC-approved is available at: <https://www.eurex.com/ex-en/rules-regs/eurex-derivatives-us/direct-market-access-from-the-us> .

In addition, Eurex representatives and participants may familiarize U.S. Qualified Institutional Buyers (QIBs) and broker-dealers with certain eligible Eurex equity options and equity index options pursuant to the terms of the SEC’s July 1, 2013 Class No-Action Relief. A complete, up-to-date list of Eurex options that are eligible under the SEC Class No-Action Relief is available at: <https://www.eurex.com/ex-en/rules-regs/eurex-derivatives-us/eurex-options-in-the-us-for-eligible-customers>. Lastly, U.S. QIBs and broker-dealers trading on behalf of QIBs may trade certain.

single-security futures and narrow-based security index futures subject to terms and conditions of the SEC’s Exchange Act Release No. 60,194 (June 30, 2009), 74 Fed. Reg. 32,200 (July 7, 2009) and the CFTC’s Division of Clearing and Intermediary Oversight Advisory Concerning the Offer and Sale of Foreign Security Futures Products to Customers Located in the United States (June 8, 2010).

Trademarks and Service Marks

Buxl®, DAX®, DivDAX®, eb.rexx®, Eurex®, Eurex Repo®, Strategy Wizard®, Euro GC®, FDAX®, FTSE 100, FWB®, GC Pooling®, GCPI®, MDAX®, ODAX®, SDAX®, TecDAX®, USD GC Pooling®, VDAX®, VDAX-NEW® and Xetra® are registered trademarks of DBAG or its affiliates and subsidiaries. MSCI®, EAFE®, ACWI® and all MSCI indexes (the “Indexes”), the data included therein, and service marks included therein are the intellectual property of MSCI Inc., its affiliates and/or their licensors (together, the “MSCI Parties”). The Indexes are provided “as is” and the user assumes the entire risk of any use it may make or permit to be made of the Indexes. No MSCI Party warrants or guarantees the originality, accuracy and/or completeness of the Indexes and each expressly disclaims all express or implied warranties. No MSCI Party shall have any liability for any errors or omissions in connection with any of the Indexes, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. For full disclaimer see msci.com/disclaimer.

ATX®, ATX® five, CECE® and RDX® are registered trademarks of Vienna Stock Exchange AG. IPD® UK Quarterly Indexes are registered trademarks of Investment Property Databank Ltd. IPD and have been licensed for the use by Eurex for derivatives. SLI®, SMI® and SMIM® are registered trademarks of SIX Swiss Exchange AG. The STOXX® indexes, the data included therein and the trademarks used in the index names are the intellectual property of STOXX Limited and/or its licensors. Eurex derivatives based on the STOXX® indexes are in no way sponsored, endorsed, sold or promoted by ISS STOXX and its licensors and neither ISS STOXX nor its licensors shall have any liability with respect thereto. PCS® and Property Claim Services® are registered trademarks of ISO Services, Inc. Korea Exchange, KRX, KOSPI and KOSPI 200 are registered trademarks of Korea Exchange Inc. The names of other companies and third-party products may be trademarks or service marks of their respective owners.

FTSE® is a trade mark of the London Stock Exchange Group companies and is used by FTSE International Limited ("FTSE") under license. All rights in the FTSE®100 Index (the "Index") vest in FTSE or its licensors. Neither FTSE nor any of their affiliates or licensors (a) assumes any liability, losses, damages, expenses or obligations in connection with any derivative product based on the Index; or (b) accepts any liability for any errors or omissions, fitness for a particular purpose or the results to be obtained from the use of the Index or related data. No party may rely on the Index or related data contained in this communication which Index and data is owned by FTSE or their affiliates. No use or distribution of the Index is permitted without FTSE's express written consent. FTSE does not promote, sponsor or endorse the content of this communication nor any financial or derivative product that it relates to.

PRIIPs: Eurex Deutschland qualifies as manufacturer of packaged retail and insurance-based investment products (PRIIPs) under Regulation (EU) No 1286/2014 on key information documents for packaged retail and insurance-based investment products (PRIIPs Regulation), and provides key information documents (KIDs) covering PRIIPs traded on Eurex Deutschland on its website under the following link: <https://www.eurex.com/ex-en/rules-regs/priips-kids>.

In addition, according to Art. 14(1) PRIIPs Regulation the person advising on, or selling, a PRIIP shall provide the KID to retail investors free of charge.

1 Introduction

This document describes all the reports distributed for Eurex Clearing – Securities Clearing Service (C7 SCS).

This document is intended to provide members with relevant information concerning reports (viz. offered reports, layout). The purpose of the Eurex Clearing XML Reports – Reference Manual is

- to explain the content of the reports, and
- to describe each report in detail.

Additional information related to generic text reports is included.

Please note that all reports are provided exclusively via the Common Report Engine.

Report Generation and Distribution

Reports are available in XML format. For some reports additionally a printable text format is available.

- Reports in XML format for Clearing Members and Settlement Institutions are automatically provided and must not be ordered explicitly.
- Reports in XML format for Trading Members must be explicitly ordered.
- Reports in printable text format are optional and must be explicitly ordered.

The report ordering form for C7 SCS reports is available on:

www.eurex.com -> Clear -> Find -> Forms

2 XML Reports Concepts used by Eurex Clearing

2.1 Eurex Clearing Terminology

Throughout the Eurex Clearing C7 SCS XML Reports documentation, specific terms are used to refer to certain objects known to C7 SCS. To avoid misunderstandings the most important terms are described in this paragraph.

Trade Types

The term **Single Trades** refers to trades received from trading locations. These can be FWB Transactions or Physical Delivery Transactions resulting from Eurex Derivatives.

The term **Net Position Trades** refers to trades resulting out of the daily C7 SCS Trade Date Netting process of Single Trades per Net Processing Unit considering the corresponding applicable Processing Method. Please note, that in case of Gross processing a Net Position Trade is generated for each affected Single Trade.

Net Position Trades can be

- securities against payment (standard case),
- securities free of payment,
- Cash-Only or
- Flat (Zero), i.e. quantity and amount equal 0.

Cash-Only and Flat (Zero) Net Position Trades can only occur if Strange Net Option is chosen as 'NET/SPLIT' or Linking before Aggregation service is used.

The term **Repo Trades** refers to Repo transactions that are received from trading location XERE.

Participant Types

The term **Trading Member (TM)** refers to financial institutions, financial services institutions and banking organizations, who trade in "CCP eligible" relevant instruments. TMs are entitled to execute proprietary and agent trades. TMs are not intended to operate directly with C7 SCS but can receive reports containing data regarding their trades and delivery instructions.

All Select Finance participants participate in the clearing process of Eurex Clearing by applying for a Basic Clearing Member license ("BCM"). Such participants are set-up as TMs in C7 SCS.

The term **Clearing Member (CM)** refers to a Eurex Clearing participant being entitled to perform the clearing of trades in "CCP eligible" instruments. In addition, CMs are liable for the timely fulfillment of all payment and delivery obligations resulting from Net Position Trades the CM is performing the clearing for. These trades relate either to the CM itself or to one of its TMs.

The Select Finance participants (i.e. BCMs) have a trilateral agreement with a Clearing Agent. For Reporting purpose, Clearing Agents will be classified under CMs in C7 SCS. Consequently CMs receive reports containing data of trades and delivery instructions belonging to themselves or one of their TMs.

The term **Settlement Institution (SI)** refers to a Eurex Clearing participant performing securities settlement via accounts at one or several of the supported (I)CSDs. SIs provide securities services between Eurex Clearing AG and the Clearing Member. However, the responsibility towards Eurex Clearing AG to fulfill trades by means of orderly settlement remains with the CM.

SIs receive reports containing data of trades and delivery instructions belonging to one of their settlement accounts independent of the CM the trade belongs to.

A participant might perform the functions associated with one or more of these participant types, given he complies with the associated prerequisites.

Accounts

Account Types: For the Single Trades from T7 and C7 (i.e. trading location XETR, XFRA, XEUR) it is distinguished between proprietary and agent business. This account type information will be used in C7 SCS for account setting and net processing purposes.

- For proprietary business: "PP" account
- For agent business (XETR, XFRA): "A1" account
- For agent business (XEUR): "A1" to "A9" account (Flex Accounts will be mapped to account type "A1")

For Repo Trades from F7 (i.e. trading location XERE), only proprietary business is allowed.

Position Accounts: For the Single Trades from C7 (i.e. trading location XEUR) also the position/flex account information is received. This position account information will be used in C7 SCS for net processing purposes.

- For Eurex (i.e. trading location XEUR): "A1" to "A9" + flex accounts.

Settlement Accounts: Settlement accounts setup at the (I)CSD are reflected in the C7 SCS system for the settlement of transactions at different (I)CSDs and T2S. Settlement accounts can be assigned to participants acting as CM and/or SI depending on the participant's roles.

Collateral Accounts: Collateral Accounts setup at Triparty Collateral Agents are reflected in the C7 SCS system for the settlement of GC Pooling transactions. In reports, Collateral Accounts will be reported as settlement accounts.

2.2 XML Report Layout

The XML Report layout consists of the basic elements structures, structure members and data types.

2.2.1 Structures

Structures are ordered collections of structure members.

They may contain fields and/or substructures as members, forming a structure tree. On top level (the root of each structure tree) there is the main report structure.

Most structures are defined as a part of one report. Structures used in several reports are called common structures.

Naming conventions for structures are:

<i>reportName</i>	Main structure of a report
<i>reportName***Grp</i>	Sub structure of a report
<i>reportName***KeyGrp</i>	Sub structure of a report which contains key fields

2.2.2 Structure Members

A structure member is either a field or another (sub-)structure. A structure member may be enriched by attributes to define report specific properties.

Fields are defined by their data type and share the name of their data type. Substructures may occur once or multiple times in a structure. The name of a substructure member is equal to the substructure name.

Each field and structure occurs at a specific place in the sequence of fields in the substructure tree of a report. Substructure can represent an exception, in the sense that they can occur multiple times.

Structure members may be mandatory or optional. Optional members may be omitted in the XML report.

2.2.3 Data Types

Data Types describe context-independent properties of a field, like its format and length. The format of a data type may be alphanumeric, numeric or signed numeric.

These properties are independent of the report where a field with this data type occurs. Since a field in a structure must have the same name as its data type, this implies that two fields with the same name always have the same data type.

2.2.4 Rules for creating the XML Structure

2.2.4.1 Main Report Structure

The report XML structure is enclosed in the tag

```
<reportName>  
  <reptHeader>  
    ...  
  </reptHeader>  
  <reportNameGrp>  
    ...  
  </reportNameGrp>  
</reportName>
```

2.2.4.2 Substructures

Substructures are written as follows:

```
<structureName>  
  ...  
</structureName>
```

The structure members occur in the sequence as they are defined in the XML Report layout. Optional members may be omitted, if they contain no data.

In case of a multiple occurrence, the <structureName> element is repeated.

2.2.4.3 Field Values

Field values are written as

```
<fieldName>fieldValue</fieldName>
```

or, if no value is given for a mandatory field,

```
<fieldName/>
```

Optional fields are omitted if no value is given.

Alphanumeric field values are written to the XML Report with their complete field length.

Examples:

```
<membClgIdCod>ABCFR</membClgIdCod>
```

Numeric values with precision 0 are written in the format DD...D without leading zeroes (D denotes a digit 0, 1, ..., 9).

Numeric values with precision > 0 are written in the format DD...D.D...D, where the number of trailing digits is given by the precision.

Example:

```
<totAmnt>12042.56</totAmnt>
```

Numeric signed values are prefixed with a plus ('+') or minus ('-') sign.

Example:

```
<totalRemAmntIsin>-23456.79</totalRemAmntIsin>
```

2.2.5 Rules for Text Reports

The text reports created from the XML reports serve to display the contained data in a human readable format. Only the XML reports are suitable for automatic processing.

Eurex Clearing strongly advises against any form of text report processing, e.g. by parsing data from the text report content.

The following sections describe some generic rules how the layout of the text reports is determined from the XML report structure.

2.2.5.1 Generic Text Report Structure

The creation of generic text reports uses the following rules:

- The global layout of a generic text report is determined by the XML report data structure.
- Data rows are shown in the sequence defined in the XML report.
- Fields are shown in the sequence defined in the XML report.
- Column widths are determined by the maximum of heading length and data field length.
- Column headings are written into one line.
- Spacing between columns is always one.
- Underlines (indicating the column width) are provided for the field width of the first row.
- Lines are wrapped, if they are longer than 132 characters.
- Starting position for wrapped lines is one character indented from second field on the first line.

2.2.5.2 Field Values

The display of field values adheres to the following rules:

- The field value display is determined by the field specific format and the specific report context.
- The field column heading is determined by the field, dependent of the report context.
- Alphanumeric values are displayed left justified with the original value retrieved from the XML Report data. Depending on the specific report, values from the XML reports are mapped to some decode in the text report.
- Numeric values are displayed right justified according to their field specific display format with the original value retrieved from the XML Report data.

The specific rules for numeric values are

- The decimal separator is a point.
 - No leading zeroes are displayed.
 - All decimal digits given by the field precision are displayed (e.g. 1.200 for precision 3).
 - "Minus signs" are written as prefix or suffix of the number.
 - It is possible to have a thousand separator for the text format (e.g. 12,345,678.90).
-

2.3 Common Report Engine

The Common Report Engine is the exclusive source for report files for Eurex Clearing members. It is an FTP solution based on an SFTP report server that allows participants to easily retrieve all of their reports from a single source.

All transactional and participant specific C7 SCS reports are available in a participant-specific directory structure.

Non-transactional and non-participant specific reports and files are available in the public area. Such reports are tagged as **CRE Area: public** in this manual.

The Common Report Engine can be accessed via leased line connectivity or via the internet.

To access the Common Report Engine, a specific user account for the Common Report Engine must be setup and a public key must be uploaded in the Member Section of the Eurex website (<https://www.eurex.com/ec-en/find/Member-Section>).

Please note that reports will only be generated for participants if an activated Common Report Engine user account exists.

The participant is responsible for the user account setup on the Common Report Engine for all markets applicable.

Detailed information to the Common Report Engine is provided on the Eurex Homepage:

www.eurex.com -> [Clear](#) -> [Support](#) -> [Technology](#) -> [Common Report Engine](#)

2.4 Available Reports

The table below provides an overview of available C7 SCS reports. The Report ID gives an indication for which members a report is available:

- Report ID ending with '0' or '5' - Clearing Members
- Report ID ending with '1' or '6' - Settlement Institutions
- Report ID ending with '2' or '7' - Trading Members

C7 SCS Report ID	Report Name	Delivery Time ¹	RAW (XML) Format	Printable Format	Description ²
CA870/ CA871	Repo Custody Payment Statement	EoD, T(+x)	Yes	No	Cash Payments related to Corporate Actions on Repo Trades.
CB830/ CB831	Trades Action Report	EoD, T(+x)	Yes	Yes	Manually inserted, deleted, buy-in Blocked/Released, Linking and Hold/Released Status Update transactions.
CD850/ CD851	Settled Cash Transactions Report	EoD, T	Yes	Yes	Cash Transactions sent to the corresponding Payment Bank and considered as settled.
CD852	Repo Settled Cash Transactions Report	EoD, T	Yes	Yes	Repo Cash Transactions sent to the corresponding Payment Bank and considered as settled.
CE840	Daily CSDR Penalties	P+1(+x)	Yes	No	Daily penalty information received from (I)CSDs.
CE845	Monthly CSDR Penalties	EoD ³	Yes	No	Aggregated monthly penalty information.
CE860/ CE861/ CE862	Pending Delivery Report	EoD, T(+x)	Yes	Yes	Portion of Net Position Trades and Repo Trades that has not yet settled. Corporate action feedback and released/on-hold quantity are considered.
CE870/ CE871/ CE872	Settled Delivery Report	EoD, T(+x)	Yes	Yes	Portion of Net Position Trades and Repo Trades that has been settled on the current business day.
CE890/ CE891/ CE892	Net Clearing Report (XEUR)	EoD ⁴ , T	Yes	No	Single Trades from Eurex deliveries and Net Position Trades (resulting from Netting/Aggregation/Gross processing) incl. quantity, cash amount, Delivery ID and Delivery Reference.

C7 SCS Report ID	Report Name	Delivery Time ¹	RAW (XML) Format	Printable Format	Description ²
CE895/ CE896/ CE897	Net Clearing Report (XETR and XFRA)	EoD ⁴ , T	Yes	No	Single Trades from FWB and Net Position Trades (resulting from Netting/Aggregation/Gross processing) incl. quantity, cash amount, Delivery ID and Delivery Reference.
CI870/ CI871/ CI872	Repo Intraday Settled Trade Report	Intraday ,T	Yes	No	Trade level information of Repo Trades that are settled on current business day. This is a multi-frequency report.
TC800/ TC801/ TC802	Repo Trade Confirmation Report	Intraday ,EoD	Yes	No	Confirmation of new Repo Trades accepted and successfully validated by Eurex Clearing. This is a multi-frequency report.
TC850/ TC851/ TC852	Repo Contracts Report	EoD, T(+x)	Yes	No	Detailed information of Repo Trades.

Table 2.1 - Available Reports

¹Provides information about Report Generation (EoD) and Business Days a trade/ delivery instruction is reported with T = Trading Day and P = Penalty Date.

²For full description of reports refer to chapter 4.

³14th business day of the calendar month following the month the trade/ delivery instruction was subject for penalty due to CSDR

⁴Net Clearing Reports are provided after Net Processing.

2.5 Intraday Report Nomenclature

Multi-frequency reports that are generated multiple times on a business day contain a run number to identify a particular report run. This run number starts with 01 on each business day and is incremented by 1 for the next generated report.

Example:

Report run 1: 20RPTTC800XXXXX2022042501.XML

Report run 2: 20RPTTC800XXXXX2022042502.XML

The EoD report is generated without a run number.

Example:

20RPTTC800XXXXX20220425.XML

3 Introduction to XML Reports

3.1 XML Report Characteristics

The XML report descriptions contain the following information:

Description	A textual description of the functional contents of the report.
Frequency	The frequency or the specific events at which the report is created.
Availability	The group of members (e.g. clearing members, settlement institutions) to which the report is available. Please refer to <i>section 3.2</i> for a detailed description of report availability.
XML Report Structure	A description of the composition of groups and tags that are used with the XML report. Underlined items represent groups; the contained tags are identified by indent level. Additional information is provided on the cardinality of subgroups. Please refer to <i>section 3.3</i> for a description of cardinalities.
M/O	A usage code to indicate whether a report tag is mandatory or optional. Please refer to <i>section 3.4</i> for a detailed description.
Text Report Heading	<p>The heading of each tag when printed in a text report. The heading depends on the tag, but may be defined different in a specific report context. Tags bound together in a group may be concatenated under one heading.</p> <p>If the text report heading is marked "(XML only)", the tag content is not written into the text report.</p>
Text Report Structure	<p>A generic description of the layout that is used with the text report. Each text report field is printed once with his heading and the generic text format which is used to display the value.</p> <p>Alphanumeric values are filled up with X, according to the field length. Numeric values are filled up with 9, together with thousand separators, decimal points and signs if applicable.</p> <p>Please remark that the layout of text reports may be subject to change without further notice.</p>

3.2 Report Availability

Reports are created and available to different groups of members.

Availability of reports to Eurex Clearing participants depends on the roles assigned to this participant.

Available for	Description
Clearing Members	Report is available for clearing members containing their individual data and the data of their associated trading members.
Settlement Institutions	Report is available for settlement institutions containing the data belonging to their settlement accounts.
Trading Members	Report is available for trading members containing their individual data.

Table 3.1 - Report Availability

The creation and distribution of XML reports for Trading Members as well as the creation of a printable version for all applicable reports depends on the Report Selection settings a Eurex Clearing participant has chosen.

3.3 Structure Cardinality

Any substructure may be contained zero, one or multiple times in a structure.

The XML report descriptions contains a cardinality information for each structure in the form

structure

or

structure, repeated *cardinality* times:

Cardinality	Description
<i>(none)</i>	Substructure occurs exactly one time
<i>m</i>	Substructure occurs exactly <i>m</i> times
<i>m ... n</i>	Substructure occurs minimal <i>m</i> , maximal <i>n</i> times
<i>m ... variable</i>	Substructure occurs <i>m</i> to any number times

Table 3.2 - Structure Cardinality Descriptors

3.4 Usage Code

The XML report descriptions contain usage codes for each tag. These codes provide information on whether a tag is mandatory or optional. *Table 3.3* below lists all applicable usage codes and provides a description.

Usage Code	Explicit	Field Usage Description
m	mandatory	Tag occurs always (but may contain an empty string)
o	optional	Tag will be omitted, if no value is given.

Table 3.3 - Field Usage Codes

4 XML Report Descriptions

The description of the XML Reports and Tags in this document is based on the configuration

4.1 CA - Custody Payment

4.1.1 CA870 Repo Custody Payment Statement

Description	<p>This report provides cash payments from corporate action events (original-runs, re-runs and cancellation-runs) related to Repo Trades. This report also shows coupon compensation for repos.</p> <p>The report provides totals for debit and credit Corporate Action cash amount per Trading Member, Clearing Member and Settlement Account.</p> <p>This report is sorted per Clearing Member, Currency, Corporate Action Value Date, Settlement Location, Settlement Account, Trading Member, Account Type, Corporate Action Entitlement Date and Corporate Action Type.</p> <p>The report is generated at the end of each C7 SCS Business Day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).</p>
Frequency	Daily.
Availability	This report is available for Clearing Members.

4.3 CD - Cash Settled Transactions Report

4.3.1 CD850 Settled Cash Transactions Report

Description	<p>The report contains all cash transactions that have been booked (and therefore considered as paid) on the current C7 SCS Business Day (value date equals current C7 SCS Business Day).</p> <p>The report includes manually generated cash transactions as well as cash transactions automatically created as a result of netting (Cash-Only Net Position Trades created due to strange nets) and fixing of Repo Trades. Cash transactions related to payments initiated by an (I)CSD in context of corporate actions/income events (dividends, interest payments, transformations in cash) are not reported in this report, however Cash transactions created by Eurex Clearing for Repo Trades as part of Corporate Action payments are included in this report.</p> <p>Cash transactions for Cash-Only Net Position Trades reported on this report can be matched to the settlement information of the Cash-Only Net Position Trade on the Settled Delivery Report. For manually generated cash transactions the Net Position Trade ID/External Trade ID is shown as 'NA' and Order Number is not filled as such transactions might relate to more than one Net Position Trade/Repo Trade.</p> <p>The report is sorted per Clearing Member, Currency, Cash Settlement Location, Cash Settlement Account, Cash Value Date, Cash Settlement Run, Delivery Settlement Location, Delivery Settlement Account, Trading Member, Account Type and Cash Transaction Type. Cash transactions are shown in chronological order.</p> <p>The report provides totals for debit and credit cash amounts per Cash Transaction Type, Account Type, Trading Member, Settlement Account, Cash Settlement Account, Cash Settlement Location and Clearing Member per currency.</p> <p>The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).</p>
Frequency	Daily.
Availability	This report is available for Clearing Members.

4.3.2 CD851 Settled Cash Transactions Report

Description	<p>The report contains all cash transactions that have been booked (and therefore considered as paid) on the current C7 SCS Business Day (value date equals current C7 SCS Business Day).</p> <p>The report includes manually generated cash transactions as well as cash transactions automatically created as a result of netting (Cash-Only Net Position Trades created due to strange nets) and fixing of Repo Trades. Cash transactions related to payments initiated by an (I)CSD in context of corporate actions/income events (dividends, interest payments, transformations in cash) are not reported in this report, however Cash transactions created by Eurex Clearing for Repo Trades as part of Corporate Action payments are included in this report.</p> <p>Cash transactions for Cash-Only Net Position Trades reported on this report can be matched to the settlement information of the Cash-Only Net Position Trade on the Settled Delivery Report. For manually generated cash transactions the Net Position Trade ID/External Trade ID is shown as 'NA' and Order Number is not filled as such transactions might relate to more than one Net Position Trade/Repo Trade.</p> <p>The report is sorted per Clearing Member, Currency, Cash Settlement Location, Cash Settlement Account, Cash Value Date, Cash Settlement Run, Delivery Settlement Location, Delivery Settlement Account, Trading Member, Account Type and Cash Transaction Type. Cash transactions are shown in chronological order.</p> <p>The report provides totals for debit and credit cash amounts per Cash Transaction Type, Account Type, Trading Member, Settlement Account, Cash Settlement Account, Cash Settlement Location and Clearing Member per currency.</p> <p>The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).</p>
Frequency	Daily.
Availability	This report is available for Settlement Institutions.

4.4.3 CE860 Pending Delivery Report

Description

This report contains all Delivery Instructions that are partially pending or fully pending on the current C7 SCS business day including Cash-Only Delivery Instructions resulting from strange nets. Settlements with Actual Settlement Date greater than current C7 SCS business day due to settlement after business day shift at (I)CSD will be considered as pending in C7 SCS and will be reported in Pending Delivery Report. However, the same will be reported as SETTLED on the next C7 SCS business day in Settled Delivery Report. The report shows remaining quantity and remaining amount per Delivery Instruction and provides a reference to the Net Position Trade or Repo Trade belonging to this Delivery Instruction. For Flat (Zero) Net Position Trades no Delivery Instructions are created and these trades are reported on Net Position Trade level until Contractual Settlement Date is reached. The same day settlement Repo Trades (e.g., front-legs from an Overnight repo) are reported at least once in this report on Contractual Settlement date.

Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. These references are:

a-Delivery Reference: unique identifier generated by C7 SCS and sent to (I)CSD

b-CSD Reference: generated by (I)CSD representing the CASCADE reference at CBF or the unique Transaction ID generated by and used at CCO; not applicable for other (I)CSDs

c-Underlying Reference: original Delivery Reference in case Corporate Action events applied on a Delivery Instruction

d-Delivery ID: unique identifier generated by C7 SCS for internal referencing

On the C7 SCS Business Day when the Net Position Trade is generated, the CREST transaction ID is not provided in field CSD Reference in this report for pending deliveries to be settled at CCO because feedback from CCO is only received on next CCO Business Day.

Delivery Instructions are reported per Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

Type of Information is used to distinguish between:

1-NET DELIVERY INFORMATION: Pending Delivery Instructions/ Net Position Trades resulting out of Net or Aggregate processing

2-GROSS DELIVERY INFORMATION: Pending Delivery Instructions/ Net Position Trades resulting out of Gross processing

3-REPO NET DELIVERY INFORMATION: Pending Delivery Instructions/ Surplus Repo Trades resulting out of Net processing

4-REPO GROSS DELIVERY INFORMATION: Pending Delivery Instructions/ Repo Trades resulting out of Gross processing

5-REPO OFFSET BLOCK INFORMATION: Offsetting Repo Trades resulting out of Net processing

Within each block the Delivery Instructions are sorted by Delivery ID and their Contractual Settlement Date starting with the most overdue settlements.

In case portions of remaining quantity and remaining amount of trades are not reflected in any active Delivery Instruction at the (I)CSD (e.g., in case of Buy-in processing, Flat (Zero) Net Position Trades, Flat (Zero) Repo Trades, Offsetting Repo Trades) these portions are reported per Trade sorted by Buy Sell indicator and trade number in ascending order and with Delivery ID 'NA'. GC Pooling Repo Trades are instructed as Exposure Adjustments and are referred to as Delivery Instructions. The delivery ID is always reported as 'NA' for GC Pooling Trades in this report as Exposure Adjustments are created on next business day just before instructing to Triparty.

In case the Delivery ID is filled with 'NA', delivery instruction specific fields as remaining and total instructed quantity/amount and Buy Sell indicator are not filled.

The report provides totals for pending amounts per Type of Information, Trading Member, Account Type, ISIN, Settlement Location/ Settlement Account per currency.

In case a trade or delivery instruction was created/adjusted due to a corporate action processed by and received from (I)CSD before creation of the report, the respective corporate action identifier (CSD's CORP ID) is reported.

The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).

Frequency

Daily.

4.4.4 CE861 Pending Delivery Report

Description

This report contains all Delivery Instructions that are partially pending or fully pending on the current C7 SCS business day including Cash-Only Delivery Instructions resulting from strange nets. Settlements with Actual Settlement Date greater than current C7 SCS business day due to settlement after business day shift at (I)CSD will be considered as pending in C7 SCS and will be reported in Pending Delivery Report. However, the same will be reported as SETTLED on the next C7 SCS business day in Settled Delivery Report. The report shows remaining quantity and remaining amount per Delivery Instruction and provides a reference to the Net Position Trade or Repo Trade belonging to this Delivery Instruction. For Flat (Zero) Net Position Trades no Delivery Instructions are created and these trades are reported on Net Position Trade level until Contractual Settlement Date is reached. The same day settlement Repo Trades (e.g., front-legs from an Overnight repo) are reported at least once in this report on Contractual Settlement date.

Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. These references are:

a-Delivery Reference: unique identifier generated by C7 SCS and sent to (I)CSD

b-CSD Reference: generated by (I)CSD representing the CASCADE reference at CBF or the unique Transaction ID generated by and used at CCO; not applicable for other (I)CSDs

c-Underlying Reference: original Delivery Reference in case Corporate Action events applied on a Delivery Instruction

d-Delivery ID: unique identifier generated by C7 SCS for internal referencing

On the C7 SCS Business Day when the Net Position Trade is generated, the CREST transaction ID is not provided in field CSD Reference in this report for pending deliveries to be settled at CCO because feedback from CCO is only received on next CCO Business Day.

Delivery Instructions are reported per Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

Type of Information is used to distinguish between:

1-NET DELIVERY INFORMATION: Pending Delivery Instructions/ Net Position Trades resulting out of Net or Aggregate processing

2-GROSS DELIVERY INFORMATION: Pending Delivery Instructions/ Net Position Trades resulting out of Gross processing

3-REPO NET DELIVERY INFORMATION: Pending Delivery Instructions/ Surplus Repo Trades resulting out of Net processing

4-REPO GROSS DELIVERY INFORMATION: Pending Delivery Instructions/ Repo Trades resulting out of Gross processing

5-REPO OFFSET BLOCK INFORMATION: Offsetting Repo Trades resulting out of Net processing

Within each block the Delivery Instructions are sorted by Delivery ID and their Contractual Settlement Date starting with the most overdue settlements.

In case portions of remaining quantity and remaining amount of trades are not reflected in any active Delivery Instruction at the (I)CSD (e.g., in case of Buy-in processing, Flat (Zero) Net Position Trades, Flat (Zero) Repo Trades, Offsetting Repo Trades) these portions are reported per Trade sorted by Buy Sell indicator and trade number in ascending order and with Delivery ID 'NA'. GC Pooling Repo Trades are instructed as Exposure Adjustments and are referred to as Delivery Instructions. The delivery ID is always reported as 'NA' for GC Pooling Trades in this report as Exposure Adjustments are created on next business day just before instructing to Triparty.

In case the Delivery ID is filled with 'NA', delivery instruction specific fields as remaining and total instructed quantity/amount and Buy Sell indicator are not filled.

The report provides totals for pending amounts per Type of Information, Trading Member, Account Type, ISIN, Settlement Location/ Settlement Account per currency.

In case a trade or delivery instruction was created/adjusted due to a corporate action processed by and received from (I)CSD before creation of the report, the respective corporate action identifier (CSD's CORP ID) is reported.

The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).

4.4.5 CE862 Pending Delivery Report

Description	<p>This report contains all Delivery Instructions that are partially pending or fully pending on the current C7 SCS business day including Cash-Only Delivery Instructions resulting from strange nets. Settlements with Actual Settlement Date greater than current C7 SCS business day due to settlement after business day shift at (I)CSD will be considered as pending in C7 SCS and will be reported in Pending Delivery Report. However, the same will be reported as SETTLED on the next C7 SCS business day in Settled Delivery Report. The report shows remaining quantity and remaining amount per Delivery Instruction and provides a reference to the Net Position Trade or Repo Trade belonging to this Delivery Instruction. For Flat (Zero) Net Position Trades no Delivery Instructions are created and these trades are reported on Net Position Trade level until Contractual Settlement Date is reached. The same day settlement Repo Trades (e.g., front-legs from an Overnight repo) are reported at least once in this report on Contractual Settlement date.</p> <p>Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. 4.4.6 CE870 Settled Delivery Report

Description

This report contains all partial or full settlements for Delivery Instructions with Actual Settlement Date equal to the current C7 SCS business day. The settlement of the offsetting Repo Trades resulting out of Settlement Date Netting and the settlement of Cash-Only Delivery Instructions and Flat (Zero) Net Position Trades resulting from strange nets are also reported on this report. Settlements with Actual Settlement Date later than current C7 SCS business day due to settlement after business day shift at (I)CSD are not considered and will be reported on the next C7 SCS business day.

In contrary to the Pending Delivery Report, partial settlements are shown individually and not as one aggregated entry per Delivery Instruction. The report shows per Delivery Instruction the quantity and amount settled with this settlement confirmation and provides the information whether the Delivery Instruction is fully or partially settled. It is possible, that a Net Position Trade or Repo Trade is settled fully or partially settled via multiple Delivery Instructions. Therefore, the settlement status of the Net Position Trade or Repo Trade might deviate from the settlement status of an individual Delivery Instruction.

Partial settlements that took place on the current C7 SCS business day before cancelling or aborting of a Delivery Instruction, will be reported on the Settled Delivery Report depending on the Actual Settlement Date and Time. Therefore, it is possible that the Settled Delivery Report may contain the partial settlements for a Delivery Instruction which is already aborted or cancelled on the previous C7 SCS business day.

Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. These references are:

a-Delivery Reference: unique identifier generated by C7 SCS and sent to (I)CSD

b-CSD Reference: generated by (I)CSD representing the CASCADE reference at CBF or the unique Transaction ID generated by and used at CCO; not applicable for other (I)CSDs

c-Underlying Reference: original Delivery Reference in case of Corporate Action events applied on a Delivery Instruction

d-Delivery ID: unique identifier generated by C7 SCS for internal referencing

The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

Type of Information is used to distinguish between:

1-NET DELIVERY INFORMATION: Settlement for Delivery Instructions / Net Position Trades with applied Net or Aggregate processing

2-GROSS DELIVERY INFORMATION: Settlement for Delivery Instructions / Net Position Trades with applied Gross processing

3-BUY-IN OR CASH SETTLED: Settlement of Net Position Trades for which Buy-in processing was successfully executed

4-REPO NET DELIVERY INFORMATION: Settlement for Delivery Instructions/ Surplus Repo Trades with applied Net processing

5-REPO GROSS DELIVERY INFORMATION: Settlement for Delivery Instructions/ Repo Trades with applied GROSS Processing

6-REPO OFFSET BLOCK INFORMATION: Settlement for Offsetting Repo Trades with applied Net processing

7-REPO BUY-IN OR REPO CASH SETTLED: Settlement of REPO Trades for which Buy-in processing was successfully executed

Within each block the Delivery Instructions are sorted by Delivery ID and listing partial settlements in chronological order.

Following settlements are reported at Trade level sorted by Buy Sell indicator and trade number in ascending order with Delivery ID 'NA'. In case the Delivery ID is filled with 'NA', delivery instruction specific fields such as settled and total instructed quantity/amount and Buy Sell indicator are not filled.

- No settlement confirmation was received from (I)CSD or settlement took place as part of Buy-in process (including cash settlement).

- Settlement of Flat (Zero) Net Position Trades and Flat (Zero) Repo Trades will be automatically set to SETTLED at Contractual Settlement Date as no Delivery Instructions are created for such trades.

- Settlement of Offsetting Repo Trades will be automatically set to SETTLED at Contractual Settlement Date for DIN netting model.

- Settlement of Offsetting Special Repo Trades with SIN netting model will be reported only after all the Delivery Instructions of the corresponding Surplus Positions are fully settled.

- Settlement of Offsetting GC Pooling Repo Trades with SIN netting model will be reported as settled after the Repo Interest Amount is settled.

GC Pooling Repo Trades are instructed as Exposure Adjustments and are referred to as Delivery Instructions in this report. In case of GC Pooling trades, the Buy Sell indicator at Delivery instruction level is derived as SELL for net Collateral Giver exposure and BUY for net Collateral Receiver exposure. It is possible, that a single GC Pooling Trade is settled via multiple instructions when the net exposure changes from collateral giver to collateral receiver and vice versa. The Repo Interest Amount payments of GC Pooling surplus-positions are also reported in this report.

The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

The report provides total values for settled amounts per Type of Information, Trading Member, Account Type, ISIN, and Settlement Location/Settlement Account per currency.

In case a trade or delivery instruction was created/adjusted due to a corporate action processed by the (I)CSD, the respective corporate action identifier (CSD's CORP ID) is reported.

The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).

4.4.7 CE871 Settled Delivery Report

Description	<p>This report contains all partial or full settlements for Delivery Instructions with Actual Settlement Date equal to the current C7 SCS business day. The settlement of the offsetting Repo Trades resulting out of Settlement Date Netting and the settlement of Cash-Only Delivery Instructions and Flat (Zero) Net Position Trades resulting from strange nets are also reported on this report. Settlements with Actual Settlement Date later than current C7 SCS business day due to settlement after business day shift at (I)CSD are not considered and will be reported on the next C7 SCS business day.</p> <p>In contrary to the Pending Delivery Report, partial settlements are shown individually and not as one aggregated entry per Delivery Instruction. The report shows per Delivery Instruction the quantity and amount settled with this settlement confirmation and provides the information whether the Delivery Instruction is fully or partially settled. It is possible, that a Net Position Trade or Repo Trade is settled fully or partially settled via multiple Delivery Instructions. Therefore, the settlement status of the Net Position Trade or Repo Trade might deviate from the settlement status of an individual Delivery Instruction. Partial settlements that took place on the current C7 SCS business day before cancelling or aborting of a Delivery Instruction, will be reported on the Settled Delivery Report depending on the Actual Settlement Date and Time. Therefore, it is possible that the Settled Delivery Report may contain the partial settlements for a Delivery Instruction which is already aborted or cancelled on the previous C7 SCS business day.</p> <p>Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. These references are:</p> <p>a-Delivery Reference: unique identifier generated by C7 SCS and sent to (I)CSD</p> <p>b-CSD Reference: generated by (I)CSD representing the CASCADE reference at CBF or the unique Transaction ID generated by and used at CCO; not applicable for other (I)CSDs</p> <p>c-Underlying Reference: original Delivery Reference in case of Corporate Action events applied on a Delivery Instruction</p> <p>d-Delivery ID: unique identifier generated by C7 SCS for internal referencing</p> <p>The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.</p> <p>Type of Information is used to distinguish between:</p> <p>1-NET DELIVERY INFORMATION: Settlement for Delivery Instructions / Net Position Trades with applied Net or Aggregate processing</p>
-------------	--

2-GROSS DELIVERY INFORMATION: Settlement for Delivery Instructions / Net Position Trades with applied Gross processing

3-BUY-IN OR CASH SETTLED: Settlement of Net Position Trades for which Buy-in processing was successfully executed

4-REPO NET DELIVERY INFORMATION: Settlement for Delivery Instructions/ Surplus Repo Trades with applied Net processing

5-REPO GROSS DELIVERY INFORMATION: Settlement for Delivery Instructions/ Repo Trades with applied GROSS Processing

6-REPO OFFSET BLOCK INFORMATION: Settlement for Offsetting Repo Trades with applied Net processing

7-REPO BUY-IN OR REPO CASH SETTLED: Settlement of REPO Trades for which Buy-in processing was successfully executed

Within each block the Delivery Instructions are sorted by Delivery ID and listing partial settlements in chronological order.

Following settlements are reported at Trade level sorted by Buy Sell indicator and trade number in ascending order with Delivery ID 'NA'. In case the Delivery ID is filled with 'NA', delivery instruction specific fields such as settled and total instructed quantity/amount and Buy Sell indicator are not filled.

- No settlement confirmation was received from (I)CSD or settlement took place as part of Buy-in process (including cash settlement).
- Settlement of Flat (Zero) Net Position Trades and Flat (Zero) Repo Trades will be automatically set to SETTLED at Contractual Settlement Date as no Delivery Instructions are created for such trades.
- Settlement of Offsetting Repo Trades will be automatically set to SETTLED at Contractual Settlement Date for DIN netting model.
- Settlement of Offsetting Special Repo Trades with SIN netting model will be reported only after all the Delivery Instructions of the corresponding Surplus Positions are fully settled.
- Settlement of Offsetting GC Pooling Repo Trades with SIN netting model will be reported as settled after the Repo Interest Amount is settled.

GC Pooling Repo Trades are instructed as Exposure Adjustments and are referred to as Delivery Instructions in this report. In case of GC Pooling trades, the Buy Sell indicator at Delivery instruction level is derived as SELL for net Collateral Giver exposure and BUY for net Collateral Receiver exposure. It is possible, that a single GC Pooling Trade is settled via multiple instructions when the net exposure changes from collateral giver to collateral receiver and vice versa. The Repo Interest Amount payments of GC Pooling surplus-positions are also reported in this report.

The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

The report provides total values for settled amounts per Type of Information, Trading Member, Account Type, ISIN, and Settlement Location/Settlement Account per currency.

In case a trade or delivery instruction was created/adjusted due to a corporate action processed by the (I)CSD, the respective corporate action identifier (CSD's CORP ID) is reported.

The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).

4.4.8 CE872 Settled Delivery Report

Description	<p>This report contains all partial or full settlements for Delivery Instructions with Actual Settlement Date equal to the current C7 SCS business day. The settlement of the offsetting Repo Trades resulting out of Settlement Date Netting and the settlement of Cash-Only Delivery Instructions and Flat (Zero) Net Position Trades resulting from strange nets are also reported on this report. Settlements with Actual Settlement Date later than current C7 SCS business day due to settlement after business day shift at (I)CSD are not considered and will be reported on the next C7 SCS business day.</p> <p>In contrary to the Pending Delivery Report, partial settlements are shown individually and not as one aggregated entry per Delivery Instruction. The report shows per Delivery Instruction the quantity and amount settled with this settlement confirmation and provides the information whether the Delivery Instruction is fully or partially settled. It is possible, that a Net Position Trade or Repo Trade is settled fully or partially settled via multiple Delivery Instructions. Therefore, the settlement status of the Net Position Trade or Repo Trade might deviate from the settlement status of an individual Delivery Instruction. Partial settlements that took place on the current C7 SCS business day before cancelling or aborting of a Delivery Instruction, will be reported on the Settled Delivery Report depending on the Actual Settlement Date and Time. Therefore, it is possible that the Settled Delivery Report may contain the partial settlements for a Delivery Instruction which is already aborted or cancelled on the previous C7 SCS business day.</p> <p>Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. These references are:</p> <ul style="list-style-type: none">a-Delivery Reference: unique identifier generated by C7 SCS and sent to (I)CSDb-CSD Reference: generated by (I)CSD representing the CASCADE reference at CBF or the unique Transaction ID generated by and used at CCO; not applicable for other (I)CSDsc-Underlying Reference: original Delivery Reference in case of Corporate Action events applied on a Delivery Instructiond-Delivery ID: unique identifier generated by C7 SCS for internal referencing <p>The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.</p> <p>Type of Information is used to distinguish between:</p> <ul style="list-style-type: none">1-NET DELIVERY INFORMATION: Settlement for Delivery Instructions / Net Position Trades with applied Net or Aggregate processing
-------------	---

2-GROSS DELIVERY INFORMATION: Settlement for Delivery Instructions / Net Position Trades with applied Gross processing

3-BUY-IN OR CASH SETTLED: Settlement of Net Position Trades for which Buy-in processing was successfully executed

4-REPO NET DELIVERY INFORMATION: Settlement for Delivery Instructions/ Surplus Repo Trades with applied Net processing

5-REPO GROSS DELIVERY INFORMATION: Settlement for Delivery Instructions/ Repo Trades with applied GROSS Processing

6-REPO OFFSET BLOCK INFORMATION: Settlement for Offsetting Repo Trades with applied Net processing

7-REPO BUY-IN OR REPO CASH SETTLED: Settlement of REPO Trades for which Buy-in processing was successfully executed

Within each block the Delivery Instructions are sorted by Delivery ID and listing partial settlements in chronological order.

Following settlements are reported at Trade level sorted by Buy Sell indicator and trade number in ascending order with Delivery ID 'NA'. In case the Delivery ID is filled with 'NA', delivery instruction specific fields such as settled and total instructed quantity/amount and Buy Sell indicator are not filled.

- No settlement confirmation was received from (I)CSD or settlement took place as part of Buy-in process (including cash settlement).

- Settlement of Flat (Zero) Net Position Trades and Flat (Zero) Repo Trades will be automatically set to SETTLED at Contractual Settlement Date as no Delivery Instructions are created for such trades.

- Settlement of Offsetting Repo Trades will be automatically set to SETTLED at Contractual Settlement Date for DIN netting model.

- Settlement of Offsetting Special Repo Trades with SIN netting model will be reported only after all the Delivery Instructions of the corresponding Surplus Positions are fully settled.

- Settlement of Offsetting GC Pooling Repo Trades with SIN netting model will be reported as settled after the Repo Interest Amount is settled.

GC Pooling Repo Trades are instructed as Exposure Adjustments and are referred to as Delivery Instructions in this report. In case of GC Pooling trades, the Buy Sell indicator at Delivery instruction level is derived as SELL for net Collateral Giver exposure and BUY for net Collateral Receiver exposure. It is possible, that a single GC Pooling Trade is settled via multiple instructions when the net exposure changes from collateral giver to collateral receiver and vice versa. The Repo Interest Amount payments of GC Pooling surplus-positions are also reported in this report.

The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

The report provides total values for settled amounts per Type of Information, Trading Member, Account Type, ISIN, and Settlement Location/Settlement Account per currency.

In case a trade or delivery instruction was created/adjusted due to a corporate action processed by the (I)CSD, the respective corporate action identifier (CSD's CORP ID) is reported.

The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).

4.4.9 CE890 Net Clearing Report - XEUR

Description	<p>This report contains Net Position Trades created on the current C7 SCS Business Day for Physical Delivery Transactions received from trading location XEUR as a result of Exercise/Assignment or Notification/Allocation (In the following referenced as Single Trades). Net Position Trades are reported per Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Trading Member, Account Type and Trade Date.</p> <p>Detailed information about the Single Trades is provided as well. The Net Position Trade ID can be used to identify which Single Trades belong to a particular Net Position Trade.</p> <p>All Net Position Trades and Single Trades referencing the same Net Position Trade ID are listed together including Cash-Only Net Position Trades potentially created due to Strange Net processing. Flat (Zero) Net Position Trades are reported as well on this report.</p> <p>A Net Position Trade representing a physical delivery request is always reported first followed by Cash-Only Net Position Trades and Single Trades referencing the same Net Position Trade ID. The Single Trades are sorted by Trading Location and Trade Number. If a Single Trade is split into one surplus and one 'no surplus' part during the netting process each part will be reported separately.</p> <p>After reporting Single Trades and their reference to the corresponding Net Position Trade further reporting is provided for Net Position Trades and Delivery Instructions. There is no further information on Single Trade level provided.</p> <p>The report also provides a Delivery Reference that represents the C7 SCS generated reference of Delivery Instructions associated with a Net Position Trade. This reference is sent to the respective (I)CSDs and can be used by members to identify the Delivery Instruction in (I)CSD reporting. Please note that for Flat (Zero) Net Position Trades no Delivery Instruction will be created and consequently, no Delivery Reference is provided on the Net Clearing Report.</p> <p>The report is generated each business day after completion of Trade Date Netting for trading location XEUR. In case no data are to be reported, an empty report is provided (NO DATA Report).</p>
Frequency	Daily.

4.4.12 CE895 Net Clearing Report - XETR and XFRA

Description	<p>This report contains Net Position Trades created on the current C7 SCS Business Day for Single Trades received from trading location XETR and XFRA. Net Position Trades are reported per Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Trading Member, Account Type and Trade Date. In case cross cash market netting is applied the resulting Net Position Trade gets the trading location ECAG assigned if the involved Single Trades originate from trading locations XETR and XFRA. If all involved Single Trades originate from the same trading location, the Net Position Trade gets the same trading location as the involved Single Trades assigned.</p> <p>All Net Position Trades and Single Trades referencing the same Net Position Trade ID are listed together including Cash-Only Net Position Trades potentially created due to Linking of Single Trades or Strange Net processing. Flat (Zero) Net Position Trades are reported as well on this report.</p> <p>A Net Position Trade representing a physical delivery request is always reported first followed by Cash-Only Net Position Trades, sorted by Link Reference and Single Trades referencing the same Net Position Trade ID. The Single Trades are sorted by Link Reference, Trading Location and Trade Number. If a Single Trade is split into one surplus and one 'no surplus' part during the netting process each part will be reported separately.</p> <p>After reporting Single Trades and their reference to the corresponding Net Position Trade further reporting is provided for Net Position Trades and Delivery Instructions. There is no further information on Single Trade level provided.</p> <p>The report also provides a Delivery Reference that represents the C7 SCS generated reference of Delivery Instructions associated with a Net Position Trade. This reference is sent to the respective (I)CSDs and can be used by members to identify the Delivery Instruction in (I)CSD reporting. Please note that for Flat (Zero) Net Position Trades no Delivery Instruction will be created and consequently, no Delivery Reference is provided on the Net Clearing Report.</p> <p>The report is generated each business day after completion of Trade Date Netting for trading location XETR and XFRA. In case no data are to be reported, an empty report is provided (NO DATA Report).</p>
Frequency	Daily.
Availability	This report is available for Clearing Members.

4.5 CI - Intraday Settled Trades Report

4.5.1 CI870 Repo Intraday Settled Trade Report

Description	<p>This report contains partial or full settlement of Repo Trades (Special Repo and GC Pooling) with Actual settlement date equal to the current C7 SCS business day. Partial settlements are shown individually and not as one aggregated entry.</p> <p>The records in this report are reported at the level of Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member, Actual Settlement Date and Contractual Settlement Date.</p> <p>This report is created multiple times during the day and at End of Day as a delta report which contains the settlement (partial or full) of Repo Trades that are received since the last run.</p> <p>In case no data are to be reported for a particular reporting run, an empty report is provided (NO DATA Report).</p> <p>As this report is generated multiple times per day, the report name contains a run number to uniquely distinguish the various intraday reports. Run number of the report created during EOD is also incremented by 1 as compared to the previous report.</p>
Frequency	<p>Daily; From 07:00 until 16:00, this report is generated every hour. From 16:00 until 18:00, this report is generated every 15 minutes. From 18:00 until 19:00 this report is generated every hour. C7 SCS triggers the creation of the report at the above-mentioned times and subsequently report is created and made available in the Common Reporting Engine.</p>

4.6 TC - Trade Confirmation

4.6.1 TC800 Repo Trade Confirmation Report

Description	<p>This report contains the details of special and GC Pooling Repo Trades (Open Repo, Fixed Repo, Variable Repo and Open Variable Repo) received by C7 SCS for current business day. This report is required to confirm new trades to the members once trade is accepted and successfully validated by Eurex Clearing. This report will not contain any modification performed on the Repo Trade. Also, cancelled Repo will be displayed once in this report.</p> <p>This report is created multiple times during the day as a delta report which contains the trades that are received since the last run. The EoD report version is created as a consolidated report with all the trades for the current C7 SCS Business Day.</p> <p>In case no data are to be reported for a particular reporting run, an empty report is provided (NO DATA Report).</p> <p>As this report is generated multiple times per day, the report name contains a run number to uniquely distinguish the various intraday reports.</p>
Frequency	Daily; Multiple times per day, From 08:00 until 13:00, this report is generated every 30 minutes. From 13:00 until Completion of Trading, this report is generated every hour. C7 SCS triggers the creation of the report at the above-mentioned times and subsequently report is created and made available in the Common Reporting Engine.
Availability	This report is available for Clearing Members.

5 Introduction to Report Tag Descriptions

This is a description of the tags of XML reports. An overview of the tag descriptions is given first.

5.1 Tag Characteristics

The characteristics of each tag are detailed giving the following information.

Description A short description of the tag's functional meaning.

Format Defines the format and size of the tag. *Table 5.1* describes common formats for tags.

Format	Description	Example
alphanumeric n	Text of maximal length n, stored as string.	A tag with format "alphanumeric 6" may contain the values "TRD001" or "ABC" or "".
numeric n [, m]	Number with n significant digits and, if given, precision m. The number is stored as a string containing the decimal point if applicable.	A tag with format "numeric 5, 2" might contain the values "314.15" or "3.14" or "0.00".
numeric signed n [, m]	Signed number with n significant digits and, if given, precision m. The number is stored as a string prefixed with the "+" or "-" sign and containing the decimal point if applicable.	A tag with format "numeric signed 5, 2" may contain the values "+314.15" or "+3.14" or "-314.15" or "+0.00".
DateFormat	Date, stored as a string in the format YYYY-MM-DD	A DateFormat tag may contain the value "2005-03-28".
TimeFormat	Time, stored as a string in the format hh:mm:ss.cc	A TimeFormat tag may contain the value "23:59:59.99"
TimeFormat18	Time, stored as a string in the format hh:mm:ss.cc.ccc.ccc	A TimeFormat18 tag may contain the value "23:59:59.99.999.999"
DateTimeFormat	Date along with time, stored as a string in format YYYY-MM-DD Thh:mm:ss.SSS	A DateTimeFormat tag may contain the value "2021-08-02 T23:59:59.121"

Table 5.1 - Tag Formats

Valid Values Some tags have a predefined limited set of values they may contain.

Decodes	The decoded literals belonging to the valid values constants as used in the generic text reports.
Descriptions	A short description of the value's functional meaning.
Where used	A reference to the XML reports which contain this tag in their structure.

6 XML Report Tag Descriptions

The following sections provide specific information on XML Report tags.

6.1 accrIntAmnt

Description This field contains the accrued interest of the trade if applicable for the traded ISIN. If the trade is reported in two parts (Surplus and not Surplus) the accrued interest is reported accordingly based on the reported total quantity for each part. This field is only filled for Single Trades.

Format numeric 15, 2

Where used: CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR
CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.2 acctPos

Description This field contains the position account, if provided with the trade. Currently only applicable for trading location XEUR.

Format alphanumeric 35

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report
CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report
CE870 Settled Delivery Report
CE871 Settled Delivery Report
CE872 Settled Delivery Report
CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR

CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.3 acctTyp

Description This field contains the account type.

Format alphanumeric 2

Valid Values	Decodes	Descriptions
A1		account for agent business
A2		account for agent business (for XEUR only)
A3		account for agent business (for XEUR only)
A4		account for agent business (for XEUR only)
A5		account for agent business (for XEUR only)
A6		account for agent business (for XEUR only)
A7		account for agent business (for XEUR only)
A8		account for agent business (for XEUR only)
A9		account for agent business (for XEUR only)
PP		account for proprietary (own) business

Where used:

- CA870 Repo Custody Payment Statement
- CA871 Repo Custody Payment Statement
- CD850 Settled Cash Transactions Report
- CD851 Settled Cash Transactions Report
- CD852 Repo Settled Cash Transactions Report
- CE860 Pending Delivery Report
- CE861 Pending Delivery Report
- CE862 Pending Delivery Report
- CE870 Settled Delivery Report
- CE871 Settled Delivery Report
- CE872 Settled Delivery Report
- CE890 Net Clearing Report - XEUR
- CE891 Net Clearing Report - XEUR
- CE892 Net Clearing Report - XEUR
- CE895 Net Clearing Report - XETR and XFRA
- CE896 Net Clearing Report - XETR and XFRA
- CE897 Net Clearing Report - XETR and XFRA
- CI870 Repo Intraday Settled Trade Report
- CI871 Repo Intraday Settled Trade Report

CI872 Repo Intraday Settled Trade Report
TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.4 acctTypOrig

Description This field contains the original account type as provided by trading location XETR or XFRA if Trading Member is considered for Optimized Trade Date Netting. This field is only filled for Single Trades.

Format alphanumeric 2

Valid Values	Decodes	Descriptions
A1		account for agent business
PP		account for proprietary (own) business

Where used: CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR
CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.5 actnTyp

Description This field specifies the action performed on Single Trades, Repo Trades or Net Position Trades.

Format alphanumeric 20

Valid Values	Decodes	Descriptions
BIBL	BIBL	Buy-in Block (Net Position Trades, Repo Trades)
BIRL	BIRL	Buy-in Release (Net Position Trades, Repo Trades)
INS	INS	Trade was inserted manually by Eurex Clearing (Single Trades, Repo Trades)
DEL	DEL	Trade was deleted manually by Eurex Clearing
BLOCK	BLCK	Release Status Update - New Status: HOLD
RELEASE	REL	Release Status Update - New Status: RELEASED
PARTIAL RELEASE	PREL	Release Status Update - New Status: PARTIALLY RELEASED
LINK	LINK	Single Trade linked
UNLINK	ULNK	Single Trade no longer linked

Where used: CB830 Trades Action Report
CB831 Trades Action Report

6.6 bic

Description This field contains the Business Identifier Code of the cash settlement location.

Format alphanumeric 11

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.7 bonPrc

Description The daily Bond Price (including accrued interest) used by Eurex Clearing for SFTR reporting and is expressed in Percentage. This field is not filled for GC Pooling.

Format numeric 19, 6

Where used: TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.8 buySellInd

Description This field contains the information whether the trade is a Buy or Sell trade from member perspective.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
B		Buy: Member received or will receive quantity/nominal amount and corresponding amount was or will be debited from the member
S		Sell: Member delivered or has to deliver quantity/nominal amount and corresponding amount was or will be credited to the member

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement
CB830 Trades Action Report
CB831 Trades Action Report
CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report
CE870 Settled Delivery Report
CE871 Settled Delivery Report
CE872 Settled Delivery Report
CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR
CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA
CI870 Repo Intraday Settled Trade Report
CI871 Repo Intraday Settled Trade Report
CI872 Repo Intraday Settled Trade Report
TC800 Repo Trade Confirmation Report

TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.9 buySellIndDivId

Description This field contains the information whether the Delivery Instruction is for Buy or Sell side from member perspective.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
B		Buy: Member received or will receive quantity/nominal amount and corresponding amount was or will be debited from the member
S		Sell: Member delivered or has to deliver quantity/nominal amount and corresponding amount was or will be credited to the member

Where used: CE840 Daily CSDR Penalties
CE845 Monthly CSDR Penalties
CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report
CE870 Settled Delivery Report
CE871 Settled Delivery Report
CE872 Settled Delivery Report

6.10 caEntIDat

Description This field contains the Entitlement date of the corporate action event.

Format DateFormat

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement

6.11 caNomAmt

Description This field contains the Nominal considered for income event.

Format numeric 15, 2

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement

6.12 caRevrComplnd

Description This field indicates whether the Reverse Compensation was performed on a settled trade due to Corporate Action.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
R		due to reverse compensation

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement

6.13 caSettlCurrency

Description This field contains the currency of the income payment.

Format alphanumeric 3

Valid Values	Decodes	Descriptions
AUD		Australian Dollar
CAD		Canadian Dollar
CHF		Swiss Francs
CNY		Chinese Renminbi
DKK		Danish Krone
EUR		Euro
GBP		Great Britain Pound
JPY		Japanese Yen
KRW		Korean Won
NOK		Norwegian Krone
NZD		New Zealand Dollar
PLN		Polish Zloty
RUB		Russian Ruble
SEK		Swedish Krona
TWD		Taiwanese Dollar
USD		US Dollar

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement

6.14 caSettlRun

Description This field contains the processing run at Clearstream in which the cash bookings were processed. This field will not be filled if the cash booking is performed by Eurex Clearing.

Format alphanumeric 5

Valid Values	Decodes	Descriptions
DD1		Direct Debit 1 cash run at CBF
DD2		Direct Debit 2 cash run at CBF
NTS		Night Time Settlement
T2S		For PfoD Payments

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement

6.15 cashAmntCredit

Description This field contains the amount settled with this Cash Transaction when the cash was credited to the member.

Format numeric 15, 2

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement
CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.16 cashAmntDebit

Description This field contains the amount settled with this Cash Transaction when the cash was debited from the member.

Format numeric 15, 2

Where used: CA870 Repo Custody Payment Statement
CA871 Repo Custody Payment Statement
CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.17 cashNetPosTrdId

Description This field contains the Cash-Only Net Position Trade ID. The field will only be filled for Cash-Only Net Position Trades and Single Trades belonging to it.

Format alphanumeric 14

Where used: CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR
CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.18 cashRef

Description This field contains the External Cash transaction ID. For manually created cash transactions, this value is equal to the internal Cash Payment System transaction ID.

Format alphanumeric 18

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.19 cashSettlAcct

Description This field contains the cash settlement account.

Format alphanumeric 35

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.20 cashSettlLoc

Description This field contains the cash settlement location.

Format alphanumeric 3

Valid Values	Decodes	Descriptions
ANA		Australian and New Zealand Bank (AUS)
BAR		Barclays Bank plc
BBK		Bundesbank
BNY		BNY Mellon
BOA		BANK OF AMERIKA NEW YORK CITY
BTM		Bank of Tokyo Mitsubishi
CBL		Clearstream Banking Luxembourg
CIT		Citibank N.A
CNY		CITIBANK N.A. NEW YORK CITY
DBL		Deutsche Bank London
DBT		DEUTSCHE BANK TRUST COMPANY A.NYC
EOC		Euroclear Bank
ESC		Euro SIC
HBY		HSBC BANK USA, N.A. NEW YORK CITY
HSB		HSBC Bank plc
JPC		JPMORGAN CHASE BANK N.A. NEW YORK C
JPG		JPMorgan Chase Bank N.A. London
RBN		RBS National Westminster Bank Plc
RBS		Royal Bank of Scotland
SMB		Sumitomo Mitsui Banking Corporation
SNB		Swiss National Bank
UBS		UBS

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.21 cashSettlRun

Description This field contains the cash settlement run.

Format alphanumeric 5

Valid Values	Decodes	Descriptions
NTP		Night Time Processing
DTP1		Day Time Processing 1
DTP2		Day Time Processing 2
DTP3		Day Time Processing 3
DTP4		Day Time Processing 4
DTP5		Day Time Processing 5
DTP6		Day Time Processing 6
ADD1		Additional 1
MISC		Miscellaneous

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.22 cashTranDat

Description This field contains the date when the Cash Transaction was created.

Format DateFormat

Where used: CD850 Settled Cash Transactions Report
CD851 Settled Cash Transactions Report
CD852 Repo Settled Cash Transactions Report

6.23 cashTranDesc

Description This field contains the Cash Transaction Type description.

Where used: CE840 Daily CSDR Penalties

6.62 penComRef

Description This field contains the reference assigned to the penalty and that is common for both the customer and their relevant counterparty.

Format alphanumeric 16

Where used: CE840 Daily CSDR Penalties
CE845 Monthly CSDR Penalties

6.63 penCurrency

Description This field contains the currency of the penalty.

Format alphanumeric 3

Where used: CE840 Daily CSDR Penalties
CE845 Monthly CSDR Penalties

6.64 penDat

Description This field contains the business day on which the penalty calculation details apply.

Format DateFormat

Where used: CE840 Daily CSDR Penalties

6.65 penDaysLate

Description This field contains the number of business days on which the cash penalty is applied.

Format numeric 3

Where used: CE840 Daily CSDR Penalties

6.66 penDiscRate

Description This field contains the Cash Discount Penalty Rate that is used to calculate the amount of the cash penalty depending on the relevant settlement currency.

Format numeric 14, 13

Where used: CE840 Daily CSDR Penalties

6.67 penFailAmnt

Description This field contains the failed amount of the Delivery Instruction.

Format numeric 15, 2

Where used: CE840 Daily CSDR Penalties

6.68 penFailQty

Description This field contains the failed quantity of the Delivery Instruction.

Format numeric 19, 6

Where used: CE840 Daily CSDR Penalties

6.69 penFailQtyTyp

Description This field contains the failed quantity type.

Format alphanumeric 4

Valid Values	Decodes	Descriptions
AMOR		Amortised value
FAMT		Face Amount
UNIT		Unit Number

Where used: CE840 Daily CSDR Penalties

6.70 penInstClassTyp

Description This field indicates the classification type of the underlying financial instrument.

Format alphanumeric 4

Where used: CE840 Daily CSDR Penalties

6.71 penSecRate

Description This field contains the Security Penalty Rate that is used to calculate the amount of the cash penalty.

Format numeric 14, 13

Where used: CE840 Daily CSDR Penalties

6.72 penStatus

Description This field contains the status of the reported cash penalty.

Format alphanumeric 4

Valid Values	Decodes	Descriptions
ACTV	Active	Penalty is active for the party
NCOM	Not Computed	Penalty could not be computed
OTHR	Other	
REIC	Reincluded	Re-inclusion of a previously removed cash penalty, to cater for mistakes in the removal of penalties
REMO	Removed	Removal of a cash penalty where settlement cannot be performed for reasons that are independent from any of the CSD participants or the CSD
RLOC	Reallocated	Re-allocation of a penalty from the instructing party to the delivering/receiving party
SWIC	Switched	Switch between the failing and non-failing party of a cash penalty

Where used: CE840 Daily CSDR Penalties

6.73 penTyp

Description This field contains the type of cash penalty.

Format alphanumeric 4

Valid Values	Decodes	Descriptions
LMFP		Late Matching Fail Penalty
SEFP		Settlement Fail Penalty

Where used: CE840 Daily CSDR Penalties
CE845 Monthly CSDR Penalties

6.74 performedBy

Description This field contains the initiator of the reported action updating the trade.

Format alphanumeric 11

Valid Values	Decodes	Descriptions
STL-INS-DAT		if due to action performed by member
EUREX		if due to action by EUREX personnel

Where used: CB830 Trades Action Report
CB831 Trades Action Report

6.75 processingMethod

Description This field contains the processing method applied for the Net Position Trade. This field is only filled for Net Position Trades.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
N		Net
A		Aggregate
G		Gross

Where used: CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR
CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.76 qtyBlock

Description This field contains the quantity now being blocked for potential Buy-in or due to member action (Hold/Release Functionality). This field is only filled for Net Position Trades and Repo Trades.

Format numeric 19, 6

Where used: CB830 Trades Action Report
CB831 Trades Action Report

6.77 qtyHold

Description This field contains the quantity of the Net Position Trade currently being blocked due to member action (Hold/Release Functionality) or a potential Buy-in. This field is not filled for Repo Trades.

Format numeric 19, 6

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.78 qtyHoldDivld

Description This field contains the quantity of the Delivery Instruction currently being blocked due to member action (Hold/Release Functionality) or a potential Buy-in. This field is not filled for Delivery Instructions of Repo Trades.

Format numeric 19, 6

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.79 recTypTrd

Description This field specifies whether reported trade is Single Trade or Net Position Trade.

Format alphanumeric 3

Valid Values	Decodes	Descriptions
SGL		Single Trade
NET		Net Position Trade with processing method NET or AGGREGATE
GRS		Net Position Trade with processing method GROSS

Where used: CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR
CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.80 releaseStat

Description This field contains the current release status of the Net Position Trade.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
H		Hold
P		Partially Released
R		Released

Where used: CB830 Trades Action Report
CB831 Trades Action Report
CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report
CE890 Net Clearing Report - XEUR
CE891 Net Clearing Report - XEUR

CE892 Net Clearing Report - XEUR
CE895 Net Clearing Report - XETR and XFRA
CE896 Net Clearing Report - XETR and XFRA
CE897 Net Clearing Report - XETR and XFRA

6.81 releaseStatDivId

Description This field contains the current release status of the Delivery Instruction. This field is not filled for Delivery Instructions of Repo Trades.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
H		Hold
P		Partially Released
R		Released

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.82 remAmnt

Description This field contains the not yet settled amount. For Net Position Trades and Repo Trades, it includes a potential Buy-in Blocked amount. For Single Trades the remaining amount always equals the total amount as settlement takes place for Net Position Trades only.

Format numeric 15, 2

Where used: CB830 Trades Action Report
CB831 Trades Action Report
CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.83 remAmntDivld

Description This field contains the not yet settled amount for the Delivery Instruction. This field is not filled for GC Pooling.

Format numeric 15, 2

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.84 remAmntTrdPerDivld

Description This field contains the not yet settled amount of the trade to be settled with the Delivery Instruction.

Format numeric 15, 2

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.85 remQty

Description This field contains the not yet settled quantity. For Net Position Trades it includes a potential Buy-in Blocked quantity. For Single Trades the remaining quantity always equals the total quantity as settlement takes place for Net Position Trades only. For Repo Trades, this field contains the not yet settled quantity and a potential Buy-in Blocked quantity and offset quantity.

Format numeric 19, 6

Where used: CB830 Trades Action Report
CB831 Trades Action Report
CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.86 remQtyDivld

Description This field contains the not yet settled quantity for the Delivery Instruction. This field is not filled for GC Pooling.

Format numeric 19, 6

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.87 remQtyTrdPerDivld

Description This field contains the not yet settled quantity of the trade to be settled with the Delivery Instruction.

Format numeric 19, 6

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.88 rpoBankIntRef

Description This field contains the internal order number assigned to the Repo Trade by the member.

Format alphanumeric 16

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report

6.89 rpoBps

Description This field contains Basis points to adjust the repo interest rate for variable and open variable repos.

Format numeric signed 8, 1

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.90 rpoClgTmStmp

Description This field contains clearing timestamp reported in UTC.

Format DateTimeFormat

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.91 rpoClosReqPend

Description This field indicates if a closing request is anticipated for a Repo Trade. This field will be filled only for Open and Open Variable Repos where no closing request has been received. The maximum allowed repurchase date(S) is the minimum of either 1096 calendar days from front leg Settlement Date or Maturity Date of underlying bond - 5 business days. In case no closing request is provided till S-1, then C7 SCS will automatically set the term leg settlement as S.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
R		Closing Request is obligatory and will be filled with "R" starting 5 business days prior to S
O		Closing Request is awaited and filled with "O" until 5 business days prior to S

Where used: TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.92 rpoCmpTrd

Description This field indicates the Repo Trades created due to compression.

Format alphanumeric 1

Valid Values	Decodes	Descriptions
Y		Yes
N		No

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.93 rpoFlxClosPrd

Description This field contains the closing period for Open and Open Variable Repo Trades. This field is not filled for Repo products with standard closing.

Format numeric 5

Where used: TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.94 rpointAmt

Description This field contains the repo interest amount.

Format numeric signed 15, 2

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.95 rpointRt

Description This field contains the rate of interest applicable for the Repo Trade.

Format numeric signed 13, 7

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.96 rpoNPUId

Description This field contains the unique identifier of the Net Processing Unit the Repo Trade is assigned to during the netting process.

Format alphanumeric 16

Where used: CE860 Pending Delivery Report
CE861 Pending Delivery Report
CE862 Pending Delivery Report

6.97 rpoRefRtCod

Description This field contains the code of the reference rate applicable for the Repo Trade. This is applicable only for variable and open variable repo.

Format alphanumeric 5

Valid Values	Decodes	Descriptions
EESTR		Euro Short-Term Rate
GCEON		STOXX GC Pooling EUR ON Index
GCESN		STOXX GC Pooling EUR SN Index
GCETN		STOXX GC Pooling EUR TN Index
GXEON		STOXX GC Pooling EUR Extended ON Index

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.98 rpoRemQty

Description This field contains the not yet settled quantity excluding the offset quantity. It also includes a potential Buy-in Blocked quantity.

Format numeric 19, 6

Where used: TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.99 rpoTotAmnt

Description This field contains the payable amount for the Repo Trade.

Format numeric 19, 6

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.100 rpoTotQty

Description This field contains the nominal quantity of the securities in the Repo Trade.

Format numeric 19, 6

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report
TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.101 rpoTrdStat

Description This field contains the information about the status of the Repo Trade.

Format alphanumeric 4

Valid Values	Decodes	Descriptions
BIBL		Buy-in Blocked trade is reported with this status (not with status LATE)
IBL		ISIN Blocked; reported for all affected trades except Buy-in Blocked trades
BLCK		Trade blocked for other reasons than IBL or BIBL
LATE		Trade not fully settled at Contractual Settlement Date and not being blocked
PART		Trade is partially settled and not being blocked or late
PEND		Full quantity of the trade is not settled yet and trade is not being blocked or late
STLD		Trade is fully settled

Where used: TC850 Repo Contracts Report
TC851 Repo Contracts Report
TC852 Repo Contracts Report

6.102 rpoTrdTmStmp

Description This field contains Trading execution time stamp captured at the trading location when the Repo Trade was finalised. This is reported in UTC.

Format DateTimeFormat

Where used: TC800 Repo Trade Confirmation Report
TC801 Repo Trade Confirmation Report
TC802 Repo Trade Confirmation Report

6.103 rpoTrdTyp

Description This field contains the trade type of the Repo Trade.

Format alphanumeric 4

Valid Values	Decodes	Descriptions
GC		GC Pooling (Fixed term)
GCOP		GC Pooling Open
GCOV		GC Pooling open variable
GCVA		GC Pooling variable
SP		Special (Fixed term)
SPOP		Special open
SPOV		Special open variable
SPVA		Special variable
