### **1. Applicable Building Blocks for Equity Options and Selected Equity Index Options**

Pursuant to Sec. 2.3 of the General Supplement to the LPA, the granting of rebates and the concrete rebate levels to be applied on the respective transaction fees are dependent on the fulfilment of Building Blocks. For this Product Specific Supplement, the following Building Blocks are applicable:

\*\* The Stress Presence Block applies to all equity options and equity index options with MMO-flag (see section 2.3.6 of the General Supplement to the LPA)

\*\*\* The Package and/or Strategy Building Blocks for scheme OESX are necessary preconditions for fulfilling the basic building block and qualification into the Advanced Building Block + Passive Volume Incentive. The Package and Strategy Building Blocks independently are not incentive paying components.

The requirements for Strategy Building Block, Larger Size Building Block, Tighter Spread Building Block, Stress Presence Building Block and Eurex EnLight Building Block are product group specific and can be found in section 2.3 of the General Supplement to the LPA.

### **2. Liquidity Provider Rebates**

\*\* No expirations with time to maturity longer than 2 years will be considered under quotation requirements

In avoidance of doubt, any rebates for an individual product will be paid out only for the respective package fulfilment. In the case of products with weekly expirations only fees in the weekly expirations which are part of the package will be rebated. Rebates will be paid out separately for monthly and sub-monthly expiries.

#### 3.2 Package Block Requirements

### 3.3 Strategy Building Block Requirements for EURO STOXX® 50 Index Options

The following requirements apply for the EURO STOXX® 50 Index Options. The Strategy Sets (CBB Sets) are defined in the General Supplement to the LPA, Annex Table.

Expiration	CBB Applicable?	CBB Set
Monthly, Weekly and Month End	Yes	5
Weekly and Month-End	Yes	4

### 3.4 Corporate Actions

In the case of a spin-off, where a basket option is created from the former product, the following applies:

- The basket will have the same Building Block requirements as the former product (except for PBB), becoming effective the date of the listing of the basket.
- If the former product was part of a package, the basket will replace the former product in the package, effective the first day of the next calendar month.
- Upon re-listing of the former product, the re-listed product will have the same LP requirements as the former product (except for PBB), becoming effective the date of the re-listing of the former product.
- If the former product was part of a package, the re-listed product will replace the former product or the basket in the package, effective the first day of the next calendar month.

In case of a corporate action e.g. a stock split, where the reference price of the underlying is adjusted, the spread and size class are reviewed to reflect the adjusted price while keeping the economics of the requirements unchanged, effective the first calendar day of the next calendar month. As part of the regular Corporate Action communication, the information about adjustments in Spread and Size class will be made available on the Eurex web site under the following link:

[Eurex Exchange > Rules & Regs > Corporate actions > Corporate action information](#)

### 3.5 Package Review

If one of the underlying instruments leaves the Euro STOXX® 50 Index, the respective single stock option will be replaced by the single stock option on the underlying entering the Euro STOXX® 50 Index with effect from the first trading day of the next calendar month following the entering of the respective single stock option. The single stock option on the underlying leaving the Euro STOXX® 50 Index has to be quoted until the end of the month where the index change took place.

Changes to the packages for the above-mentioned reasons will be reflected in the quotation parameters table (cp. Sec. 4.2) as of the first trading day of the next calendar month.
